

The relationship between Boeing and DAMRC – choosing the Danish fighter

The 24th of March 2010 the Danish Minister of Defense Gitte Lillelund Bech postponed the choice of the Danish fighter of the future at least two more years.

(<http://jp.dk/indland/article2020816.ece>).

To the American aerospace giant, who is a key partner to DAMRC, the postponing of things have had some consequences. To DAMRC the most important consequence is that the starting date for the “DAMRC kickoff project” is postponed to the middle of May.

In connecting with the statement of the Danish Minister of Defense, the Boeing Company has announced its continuous support to DAMRC.

Founding General Meeting

At the Founding General Meeting (FGM) the charter of the association DAMRC was approved, as well as the prices of the different types of memberships were accepted.

For further information on membership and charter, please contact Project Manager Klaus Bonde Ørskov kbo@eu-center.dk.

At present times DAMRC consists of the working chairman Ole M. Lauridsen (Terma), who was elected at the FGM. Daily business is carried out by Project Manager Klaus Bonde Ørskov and Project Consultant Christian Göte.

DAMRC expects the number of employees to reach five before April 2011 in accordance to the growth strategy of DAMRC.

After the FGM all of the DAMRC-Founding Partners showed their onwards commitment to DAMRC by joining DAMRC and paying their respective membership fee.

The moral and tangible support of the DAMRC-Founding Partners towards DAMRC secures the future operations of DAMRC.

New members are bid welcome

DAMRC has 10 paying members, and all of them have been supporting the DAMRC since the MoU with Boeing in early September 2009

In the time from September 2009 and until now, there has been a need for focusing on the establishment of DAMRC, resulting in that new members were denied membership of DAMRC. As DAMRC now is formally established as an association new members are allowed access to the association and can apply for membership.

If you are of the opinion, that DAMRC might be able to create value to your company, community, your association or institution, don't hesitate to contact us. Please contact Project Manager Klaus Bonde Ørskov at kbo@eu-center.dk.

New exciting project in the pipeline

DAMRC is invited to join “Danish Technological Institute” in an application as an “Innovation consortium” this autumn. The approval of the project will place DAMRC as a key player in a development project about “metal-composites” of the future. The potential scope of this

project has of great dimensions, as the outcome of the project is expected to contribute to competitive edge of Danish companies within the metal processing industry.

www.damrc.com – coming soon

In connection with the public visibility of DAMRC different actions are being taken. In connection to this DAMRC has recently hooked up with an ICM-scholar (International communication and Multimedia). The scholar is, as part of his Bachelor-project, contributing with practical and design related issues in the creation of the DAMRC homepage.

The homepage www.damrc.com and DAMRC mail are expected to be up and running around the 1st of May 2010.
