

Optimization

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

Odense Congress Center 28. februar - 3. marts

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

WWW.SPÅNLIGAEN.DK

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". If you have received the newsletter by mistake, you may unsubscribe at the same mail with the text: "Unsubscribe from the DAMRC newsletter".

This DAMRC newsletter may be forwarded to everyone interested in the DAMRC, but may only be reproduced/copied in agreement with CEO Klaus Bonde Ørskov kbo@damrc.com

Optimization

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

WWW.SPANLIGAEN.DK

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". If you have received the newsletter by mistake, you may unsubscribe at the same mail with the text: "Unsubscribe from the DAMRC newsletter".

This DAMRC newsletter may be forwarded to everyone interested in the DAMRC, but may only be reproduced/copied in agreement with CEO Klaus Bonde Ørskov kbo@damrc.com

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". If you have received the newsletter by mistake, you may unsubscribe at the same mail with the text: "Unsubscribe from the DAMRC newsletter".

This DAMRC newsletter may be forwarded to everyone interested in the DAMRC, but may only be reproduced/copied in agreement with CEO Klaus Bonde Ørskov kbo@damrc.com

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

Odense Congress Center 28. februar - 3. marts

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". If you have received the newsletter by mistake, you may unsubscribe at the same mail with the text: "Unsubscribe from the DAMRC newsletter".

This DAMRC newsletter may be forwarded to everyone interested in the DAMRC, but may only be reproduced/copied in agreement with CEO Klaus Bonde Ørskov kbo@damrc.com

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

WWW.SPÅNLIGAEN.DK

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". If you have received the newsletter by mistake, you may unsubscribe at the same mail with the text: "Unsubscribe from the DAMRC newsletter".

This DAMRC newsletter may be forwarded to everyone interested in the DAMRC, but may only be reproduced/copied in agreement with CEO Klaus Bonde Ørskov kbo@damrc.com

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". If you have received the newsletter by mistake, you may unsubscribe at the same mail with the text: "Unsubscribe from the DAMRC newsletter".

This DAMRC newsletter may be forwarded to everyone interested in the DAMRC, but may only be reproduced/copied in agreement with CEO Klaus Bonde Ørskov kbo@damrc.com

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Rasmus The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

WWW.SPÅNLIGAEN.DK

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". If you have received the newsletter by mistake, you may unsubscribe at the same mail with the text: "Unsubscribe from the DAMRC newsletter".

This DAMRC newsletter may be forwarded to everyone interested in the DAMRC, but may only be reproduced/copied in agreement with CEO Klaus Bonde Ørskov kbo@damrc.com

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

WWW.SPÅNLIGAEN.DK

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". If you have received the newsletter by mistake, you may unsubscribe at the same mail with the text: "Unsubscribe from the DAMRC newsletter".

This DAMRC newsletter may be forwarded to everyone interested in the DAMRC, but may only be reproduced/copied in agreement with CEO Klaus Bonde Ørskov kbo@damrc.com

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

WWW.SPANLIGAEN.DK

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". If you have received the newsletter by mistake, you may unsubscribe at the same mail with the text: "Unsubscribe from the DAMRC newsletter".

This DAMRC newsletter may be forwarded to everyone interested in the DAMRC, but may only be reproduced/copied in agreement with CEO Klaus Bonde Ørskov kbo@damrc.com

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

WWW.SPANLIGAEN.DK

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". If you have received the newsletter by mistake, you may unsubscribe at the same mail with the text: "Unsubscribe from the DAMRC newsletter".

This DAMRC newsletter may be forwarded to everyone interested in the DAMRC, but may only be reproduced/copied in agreement with CEO Klaus Bonde Ørskov kbo@damrc.com

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

Odense Congress Center 28. februar - 3. marts

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

WWW.SPANLIGAEN.DK

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". If you have received the newsletter by mistake, you may unsubscribe at the same mail with the text: "Unsubscribe from the DAMRC newsletter".

This DAMRC newsletter may be forwarded to everyone interested in the DAMRC, but may only be reproduced/copied in agreement with CEO Klaus Bonde Ørskov kbo@damrc.com

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". If you have received the newsletter by mistake, you may unsubscribe at the same mail with the text: "Unsubscribe from the DAMRC newsletter".

This DAMRC newsletter may be forwarded to everyone interested in the DAMRC, but may only be reproduced/copied in agreement with CEO Klaus Bonde Ørskov kbo@damrc.com

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". If you have received the newsletter by mistake, you may unsubscribe at the same mail with the text: "Unsubscribe from the DAMRC newsletter".

This DAMRC newsletter may be forwarded to everyone interested in the DAMRC, but may only be reproduced/copied in agreement with CEO Klaus Bonde Ørskov kbo@damrc.com

My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

Odense Congress Center 28. februar - 3. marts

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". If you have received the newsletter by mistake, you may unsubscribe at the same mail with the text: "Unsubscribe from the DAMRC newsletter".

This DAMRC newsletter may be forwarded to everyone interested in the DAMRC, but may only be reproduced/copied in agreement with CEO Klaus Bonde Ørskov kbo@damrc.com

Optimization

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

Odense Congress Center 28. februar - 3. marts

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". If you have received the newsletter by mistake, you may unsubscribe at the same mail with the text: "Unsubscribe from the DAMRC newsletter".

This DAMRC newsletter may be forwarded to everyone interested in the DAMRC, but may only be reproduced/copied in agreement with CEO Klaus Bonde Ørskov kbo@damrc.com

Optimization

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

Odense Congress Center 28. februar - 3. marts

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". If you have received the newsletter by mistake, you may unsubscribe at the same mail with the text: "Unsubscribe from the DAMRC newsletter".

This DAMRC newsletter may be forwarded to everyone interested in the DAMRC, but may only be reproduced/copied in agreement with CEO Klaus Bonde Ørskov kbo@damrc.com

Optimization

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Rasmus.

My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

WWW.SPANLIGAEN.DK

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". If you have received the newsletter by mistake, you may unsubscribe at the same mail with the text: "Unsubscribe from the DAMRC newsletter".

This DAMRC newsletter may be forwarded to everyone interested in the DAMRC, but may only be reproduced/copied in agreement with CEO Klaus Bonde Ørskov kbo@damrc.com

Optimization

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

Odense Congress Center 28. februar - 3. marts

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". If you have received the newsletter by mistake, you may unsubscribe at the same mail with the text: "Unsubscribe from the DAMRC newsletter".

This DAMRC newsletter may be forwarded to everyone interested in the DAMRC, but may only be reproduced/copied in agreement with CEO Klaus Bonde Ørskov kbo@damrc.com

Optimization

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

WWW.SPANLIGAEN.DK

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". If you have received the newsletter by mistake, you may unsubscribe at the same mail with the text: "Unsubscribe from the DAMRC newsletter".

This DAMRC newsletter may be forwarded to everyone interested in the DAMRC, but may only be reproduced/copied in agreement with CEO Klaus Bonde Ørskov kbo@damrc.com

Optimization

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". If you have received the newsletter by mistake, you may unsubscribe at the same mail with the text: "Unsubscribe from the DAMRC newsletter".

This DAMRC newsletter may be forwarded to everyone interested in the DAMRC, but may only be reproduced/copied in agreement with CEO Klaus Bonde Ørskov kbo@damrc.com

Optimization

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Rasmus.

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

Odense Congress Center 28. februar - 3. marts

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

WWW.SPANLIGAEN.DK

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". If you have received the newsletter by mistake, you may unsubscribe at the same mail with the text: "Unsubscribe from the DAMRC newsletter".

This DAMRC newsletter may be forwarded to everyone interested in the DAMRC, but may only be reproduced/copied in agreement with CEO Klaus Bonde Ørskov kbo@damrc.com

Optimization

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

Odense Congress Center 28. februar - 3. marts

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

WWW.SPÅNLIGAEN.DK

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". If you have received the newsletter by mistake, you may unsubscribe at the same mail with the text: "Unsubscribe from the DAMRC newsletter".

This DAMRC newsletter may be forwarded to everyone interested in the DAMRC, but may only be reproduced/copied in agreement with CEO Klaus Bonde Ørskov kbo@damrc.com

Optimization

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". If you have received the newsletter by mistake, you may unsubscribe at the same mail with the text: "Unsubscribe from the DAMRC newsletter".

This DAMRC newsletter may be forwarded to everyone interested in the DAMRC, but may only be reproduced/copied in agreement with CEO Klaus Bonde Ørskov kbo@damrc.com

Optimization

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". If you have received the newsletter by mistake, you may unsubscribe at the same mail with the text: "Unsubscribe from the DAMRC newsletter".

This DAMRC newsletter may be forwarded to everyone interested in the DAMRC, but may only be reproduced/copied in agreement with CEO Klaus Bonde Ørskov kbo@damrc.com

Optimization

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". If you have received the newsletter by mistake, you may unsubscribe at the same mail with the text: "Unsubscribe from the DAMRC newsletter".

This DAMRC newsletter may be forwarded to everyone interested in the DAMRC, but may only be reproduced/copied in agreement with CEO Klaus Bonde Ørskov kbo@damrc.com

Optimization

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Rasmus The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

WWW.SPÅNLIGAEN.DK

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". If you have received the newsletter by mistake, you may unsubscribe at the same mail with the text: "Unsubscribe from the DAMRC newsletter".

This DAMRC newsletter may be forwarded to everyone interested in the DAMRC, but may only be reproduced/copied in agreement with CEO Klaus Bonde Ørskov kbo@damrc.com

Optimization

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

Odense Congress Center 28. februar - 3. marts

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". If you have received the newsletter by mistake, you may unsubscribe at the same mail with the text: "Unsubscribe from the DAMRC newsletter".

This DAMRC newsletter may be forwarded to everyone interested in the DAMRC, but may only be reproduced/copied in agreement with CEO Klaus Bonde Ørskov kbo@damrc.com

Optimization

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

Odense Congress Center 28. februar - 3. marts

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

WWW.SPANLIGAEN.DK

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". If you have received the newsletter by mistake, you may unsubscribe at the same mail with the text: "Unsubscribe from the DAMRC newsletter".

This DAMRC newsletter may be forwarded to everyone interested in the DAMRC, but may only be reproduced/copied in agreement with CEO Klaus Bonde Ørskov kbo@damrc.com

Optimization

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

Odense Congress Center 28. februar - 3. marts

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

WWW.SPANLIGAEN.DK

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". If you have received the newsletter by mistake, you may unsubscribe at the same mail with the text: "Unsubscribe from the DAMRC newsletter".

This DAMRC newsletter may be forwarded to everyone interested in the DAMRC, but may only be reproduced/copied in agreement with CEO Klaus Bonde Ørskov kbo@damrc.com

Optimization

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

Odense Congress Center 28. februar - 3. marts

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". If you have received the newsletter by mistake, you may unsubscribe at the same mail with the text: "Unsubscribe from the DAMRC newsletter".

This DAMRC newsletter may be forwarded to everyone interested in the DAMRC, but may only be reproduced/copied in agreement with CEO Klaus Bonde Ørskov kbo@damrc.com

Optimization

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". If you have received the newsletter by mistake, you may unsubscribe at the same mail with the text: "Unsubscribe from the DAMRC newsletter".

This DAMRC newsletter may be forwarded to everyone interested in the DAMRC, but may only be reproduced/copied in agreement with CEO Klaus Bonde Ørskov kbo@damrc.com

Optimization

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

Odense Congress Center 28. februar - 3. marts

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

WWW.SPANLIGAEN.DK

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". If you have received the newsletter by mistake, you may unsubscribe at the same mail with the text: "Unsubscribe from the DAMRC newsletter".

This DAMRC newsletter may be forwarded to everyone interested in the DAMRC, but may only be reproduced/copied in agreement with CEO Klaus Bonde Ørskov kbo@damrc.com

Optimization

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

Odense Congress Center 28. februar - 3. marts

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

WWW.SPÅNLIGAEN.DK

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". If you have received the newsletter by mistake, you may unsubscribe at the same mail with the text: "Unsubscribe from the DAMRC newsletter".

This DAMRC newsletter may be forwarded to everyone interested in the DAMRC, but may only be reproduced/copied in agreement with CEO Klaus Bonde Ørskov kbo@damrc.com

Optimization

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

Odense Congress Center

28. februar - 3. marts

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". If you have received the newsletter by mistake, you may unsubscribe at the same mail with the text: "Unsubscribe from the DAMRC newsletter".

This DAMRC newsletter may be forwarded to everyone interested in the DAMRC, but may only be reproduced/copied in agreement with CEO Klaus Bonde Ørskov kbo@damrc.com

Optimization

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

Odense Congress Center 28. februar - 3. marts

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

Please find more information on our webpage damrc.com

Spånligaen 2018

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". If you have received the newsletter by mistake, you may unsubscribe at the same mail with the text: "Unsubscribe from the DAMRC newsletter".

This DAMRC newsletter may be forwarded to everyone interested in the DAMRC, but may only be reproduced/copied in agreement with CEO Klaus Bonde Ørskov kbo@damrc.com

Optimization

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

Spånligaen 2018

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". If you have received the newsletter by mistake, you may unsubscribe at the same mail with the text: "Unsubscribe from the DAMRC newsletter".

This DAMRC newsletter may be forwarded to everyone interested in the DAMRC, but may only be reproduced/copied in agreement with CEO Klaus Bonde Ørskov kbo@damrc.com

Optimization

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

Odense Congress Center 28. februar - 3. marts

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". If you have received the newsletter by mistake, you may unsubscribe at the same mail with the text: "Unsubscribe from the DAMRC newsletter".

This DAMRC newsletter may be forwarded to everyone interested in the DAMRC, but may only be reproduced/copied in agreement with CEO Klaus Bonde Ørskov kbo@damrc.com

Optimization

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

Spånligaen 2018

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". If you have received the newsletter by mistake, you may unsubscribe at the same mail with the text: "Unsubscribe from the DAMRC newsletter".

This DAMRC newsletter may be forwarded to everyone interested in the DAMRC, but may only be reproduced/copied in agreement with CEO Klaus Bonde Ørskov kbo@damrc.com

Optimization

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

Odense Congress Center 28. februar - 3. marts

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Spånligaen 2018

WWW.SPÅNLIGAEN.DK

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". If you have received the newsletter by mistake, you may unsubscribe at the same mail with the text: "Unsubscribe from the DAMRC newsletter".

This DAMRC newsletter may be forwarded to everyone interested in the DAMRC, but may only be reproduced/copied in agreement with CEO Klaus Bonde Ørskov kbo@damrc.com

Optimization

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

Spånligaen 2018

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". If you have received the newsletter by mistake, you may unsubscribe at the same mail with the text: "Unsubscribe from the DAMRC newsletter".

This DAMRC newsletter may be forwarded to everyone interested in the DAMRC, but may only be reproduced/copied in agreement with CEO Klaus Bonde Ørskov kbo@damrc.com

Optimization

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Optimization

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

Odense Congress Center 28. februar - 3. marts

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Optimization

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Optimization

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

Odense Congress Center 28. februar - 3. marts

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

Optimization

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

Odense Congress Center 28. februar - 3. marts

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Optimization

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

Odense Congress Center 28. februar - 3. marts

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

Optimization

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

Optimization

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

Odense Congress Center 28. februar - 3. marts

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

Optimization

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

Optimization

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

Optimization

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Rasmus The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

WWW.SPANLIGAEN.DK

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Optimization

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

Optimization

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

Odense Congress Center 28. februar - 3. marts

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

Optimization

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

WWW.SPÅNLIGAEN.DK

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

Optimization

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

WWW.SPANLIGAEN.DK

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". Optimization

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

WWW.SPANLIGAEN.DK

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". Optimization

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

Odense Congress Center 28. februar - 3. marts

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

WWW.SPÅNLIGAEN.DK

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". If you have received the newsletter by mistake, you may unsubscribe at the same mail with the text: "Unsubscribe from the DAMRC newsletter".

This DAMRC newsletter may be forwarded to everyone interested in the DAMRC, but may only be reproduced/copied in agreement with CEO Klaus Bonde Ørskov kbo@damrc.com

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

Odense Congress Center 28. februar - 3. marts

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". If you have received the newsletter by mistake, you may unsubscribe at the same mail with the text: "Unsubscribe from the DAMRC newsletter".

This DAMRC newsletter may be forwarded to everyone interested in the DAMRC, but may only be reproduced/copied in agreement with CEO Klaus Bonde Ørskov kbo@damrc.com

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

Odense Congress Center 28. februar - 3. marts

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

WWW.SPÅNLIGAEN.DK

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". If you have received the newsletter by mistake, you may unsubscribe at the same mail with the text: "Unsubscribe from the DAMRC newsletter".

This DAMRC newsletter may be forwarded to everyone interested in the DAMRC, but may only be reproduced/copied in agreement with CEO Klaus Bonde Ørskov kbo@damrc.com

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

WWW.SPANLIGAEN.DK

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". If you have received the newsletter by mistake, you may unsubscribe at the same mail with the text: "Unsubscribe from the DAMRC newsletter".

This DAMRC newsletter may be forwarded to everyone interested in the DAMRC, but may only be reproduced/copied in agreement with CEO Klaus Bonde Ørskov kbo@damrc.com

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

Odense Congress Center 28. februar - 3. marts

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

WWW.SPANLIGAEN.DK

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". If you have received the newsletter by mistake, you may unsubscribe at the same mail with the text: "Unsubscribe from the DAMRC newsletter".

This DAMRC newsletter may be forwarded to everyone interested in the DAMRC, but may only be reproduced/copied in agreement with CEO Klaus Bonde Ørskov kbo@damrc.com

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

WWW.SPÅNLIGAEN.DK

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". If you have received the newsletter by mistake, you may unsubscribe at the same mail with the text: "Unsubscribe from the DAMRC newsletter".

This DAMRC newsletter may be forwarded to everyone interested in the DAMRC, but may only be reproduced/copied in agreement with CEO Klaus Bonde Ørskov kbo@damrc.com

This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

Odense Congress Center 28. februar - 3. marts

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". If you have received the newsletter by mistake, you may unsubscribe at the same mail with the text: "Unsubscribe from the DAMRC newsletter".

This DAMRC newsletter may be forwarded to everyone interested in the DAMRC, but may only be reproduced/copied in agreement with CEO Klaus Bonde Ørskov kbo@damrc.com

Optimization

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

Odense Congress Center 28. februar - 3. marts

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". If you have received the newsletter by mistake, you may unsubscribe at the same mail with the text: "Unsubscribe from the DAMRC newsletter".

This DAMRC newsletter may be forwarded to everyone interested in the DAMRC, but may only be reproduced/copied in agreement with CEO Klaus Bonde Ørskov kbo@damrc.com

Optimization

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

Odense Congress Center 28. februar - 3. marts

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

WWW.SPANLIGAEN.DK

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". If you have received the newsletter by mistake, you may unsubscribe at the same mail with the text: "Unsubscribe from the DAMRC newsletter".

This DAMRC newsletter may be forwarded to everyone interested in the DAMRC, but may only be reproduced/copied in agreement with CEO Klaus Bonde Ørskov kbo@damrc.com

Optimization

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

WWW.SPANLIGAEN.DK

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". If you have received the newsletter by mistake, you may unsubscribe at the same mail with the text: "Unsubscribe from the DAMRC newsletter".

This DAMRC newsletter may be forwarded to everyone interested in the DAMRC, but may only be reproduced/copied in agreement with CEO Klaus Bonde Ørskov kbo@damrc.com

Optimization

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

WWW.SPANLIGAEN.DK

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". If you have received the newsletter by mistake, you may unsubscribe at the same mail with the text: "Unsubscribe from the DAMRC newsletter".

This DAMRC newsletter may be forwarded to everyone interested in the DAMRC, but may only be reproduced/copied in agreement with CEO Klaus Bonde Ørskov kbo@damrc.com

Optimization

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

The DAMRC has a different approach to optimization, and I must admit we were kind of hesitant when we got the invitation to enter the project. Studying the opportunities given by SET via this Machining Project it became obvious that we should participate. Looking back our knowledge on machining

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

Odense Congress Center 28. februar - 3. marts

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

WWW.SPÅNLIGAEN.DK

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". If you have received the newsletter by mistake, you may unsubscribe at the same mail with the text: "Unsubscribe from the DAMRC newsletter".

This DAMRC newsletter may be forwarded to everyone interested in the DAMRC, but may only be reproduced/copied in agreement with CEO Klaus Bonde Ørskov kbo@damrc.com

Optimization

Cooperating with the business development center in Skive (SET) we have accomplished several project-optimizing processes at the local companies Jeco A/S and Formkon A/S blot located in the area around Skive.

Project manager Leo Ravn-Nielsen from SET states to the Danish magazine Teknovation:

“Our aim is to assist the companies in our vicinity in getting the best possible terms and conditions and furthermore maximizing their opportunities of running their businesses in the optimum way. As when companies work even

“This project has been a pleasure and an important eye opener. We have tested one tool and we now have knowledge about the optimum settings for this setup. We were surprised to find that there was quite a gap between the previous settings and the optimum settings. This new setup will lead to higher efficiency and lesser tool wear, which is a significant side effect. My point is that it is easy to buy a lot of the newest technology but it is much more important to know the optimum setup. Through this project with the DAMRC we got even more focus on this aspect of our setup,” stated to Teknovation by Ras-

processes, setup and tools has improved significant and I find absolutely no reservations on cooperation with the DAMRC again. We became more aware of the machining processes and the manufacturing of the materials. Working with the specific parameters, we are now more aware of the opportunities for future setup and optimization,” stated to Teknovation by Peter Hjelm, CEO of Formkon A/S

New Members

It is with pleasure that we welcome our new member, Tibnor and we are looking to cooperating with Tibnor.

Tibnor is a multi-metal full-range distributor. This means a broad range of steel and non-ferrous metals answering to all needs that may occur within the manufacturing industry in the Nordics.

At Tibnor, they are specialists in manufacturing materials and configuring systems for heavy plates, strip steel, merchant steel, engineering steel, tubes and profiles, reinforcement bars, stainless and non-ferrous metals.

The Danish division of the company was established 1920. There are about 800 employees in Denmark, Sweden, Norway and Finland of which about 30 are employed in Denmark.

Tibnor has signed up as a member based on a wish to contribute to the optimization and research in materials and manufacturing.

METALVAREFABRIK • C.N.C. DREJNING • C.N.C. FRÆSNING

Likewise, it is with pleasure that we welcome Jeco as new member. The previously described optimization project inspired Jeco to becoming a member to get the opportunity to access new technology and further optimization processes.

We are looking forward to move on with the cooperation.

VTM 2017

We are a part of the VTM-fair (machine tools) in Odense Congress Centre. You can find us at booth 6501. Admission to the fair is free. Please, pay us a visit on our stand. The fair is on from February 28 to March 3.

Odense Congress Center 28. februar - 3. marts

New employees

With pleasure, we introduce our four newest employees:

Christian Merrild is employed as R&D Engineer

Johan Øllgaard Larsen is employed as R&D Engineer.

Karen-Inge Burgdorff Sørensen is employed as service assistant.

Steen Mikkelsen is employed as art director.

Please, give them all a warm welcome.

Courses

As usual, we give a wide range of courses and seminars. We hope to cover some topics relevant to you and that you would like to attend. Please, find more information on the courses and seminars below and sign up by mailing Lene at len@damrc.com

2017

Advanced optimizing turning – 27/3, 3/4 and 8-9/5

We will focus on the updated knowledge about options on advanced turning processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Advanced optimizing milling – 27/3, 18/4 and 15-16/5

We will focus on the updated knowledge about options on advanced milling processes. Based on this knowledge you will be able to apply tools in cutting parameters, manufacturing strategies and dynamic testing all for the purpose of optimizing you machining challenges.

Please find more information on our webpage damrc.com

Spånligaen 2018

Speaking of fairs... The next edition of our own in-house fair is now scheduled and it will be taking place on January 17. – 19. 2018. Please, mark the dates in your calendar. No worries if you need to attend the NC Skills, which takes place at the same time. The DAMRC is located in close vicinity of MCH where NC Skills is held, which makes it possible for you to attend both.

Should you want to learn more about project collaboration with the DAMRC and what the DAMRC can do for you and your business, you are most welcome to contact Klaus Bonde Ørskov – kbo@damrc.com

If you receive this newsletter from a colleague and wish to register yourself for future updates from the DAMRC, simply send an e-mail to len@damrc.com with the text "Sign up to the DAMRC newsletter". If you have received the newsletter by mistake, you may unsubscribe at the same mail with the text: "Unsubscribe from the DAMRC newsletter".

This DAMRC newsletter may be forwarded to everyone interested in the DAMRC, but may only be reproduced/copied in agreement with CEO Klaus Bonde Ørskov kbo@damrc.com
